

Saving water helps your business by:

Reducing operational costs.

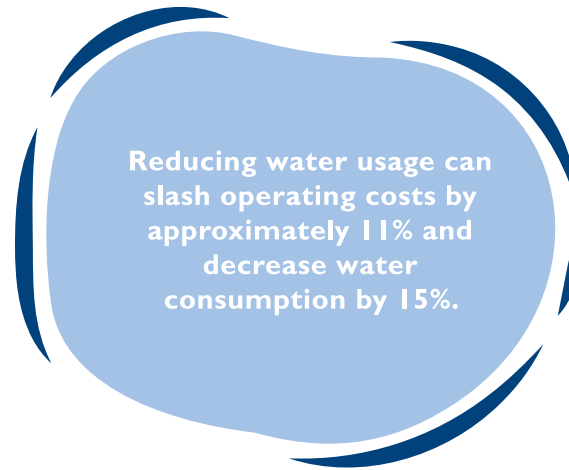

Lowering the risk of water shortages in your area.

Generating less wastewater, which in turn results in less energy usage and lower costs for your business.

Other actions you can take to save water

- ✓ Select appropriate laundry load sizes.
- ✓ Begin with easy steps like rainwater harvesting. Use this water for gardening and flushing toilets.
- ✓ Highlight your environmentally friendly initiatives on your website, social media platforms, hotel lobby, and guest room directories.
- ✓ Switch to low flow taps and showerheads.
- ✓ When replacing equipment, choose the latest and most efficient option available.
- ✓ Conduct a professional water audit.
- ✓ Invest in a dishwasher as it can significantly reduce water usage.
- ✓ Upgrade your plumbing system when necessary.

Reducing water usage can slash operating costs by approximately 11% and decrease water consumption by 15%.

What You Can Do to Save Water

“Water costs can be reduced by up to 50% by investing in no- and low-cost water reduction technologies”

USAID
FROM THE AMERICAN PEOPLE

What You Can Do To Save Water

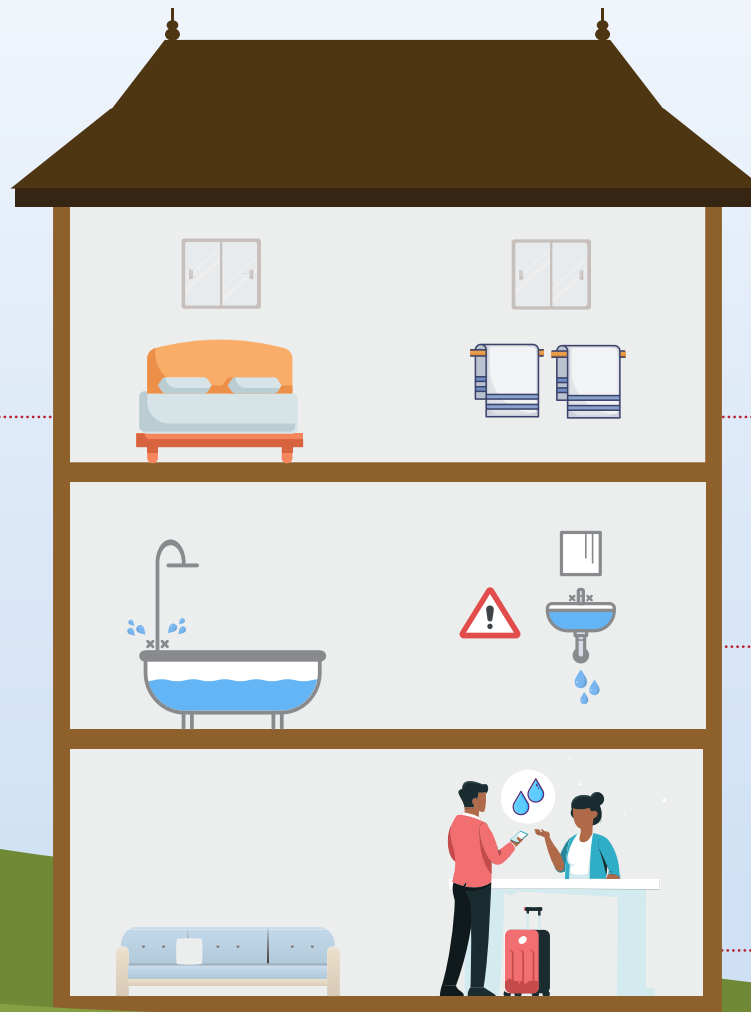

1 Encourage guests to elect **changing towels and sheets only every three to four days**

2 **Water the garden at dusk or dawn** to avoid excessive evaporation of water

3 Put **only the necessary amount of towels** in guest rooms

4 Stay vigilant! **Conduct regular checks for leaks and set up a reporting system** to promptly alert maintenance

5 **Educate guests** about water-saving practices during their stay

Water-efficient equipment and fixtures typically use at least **20% less water** than standard models

A faucet leaking just once per second can waste up to **12,000 liters of water** in a year

Implementing **linen and towel reuse programs** in guest rooms can cut laundry loads by **17%**
